

## Alter Pharma and Konings donate large quantity of hand sanitizer to business partners in need

3 March 2021, 08:00

Over the course of 2020 and in light of the health crisis the world was (and still is) facing, the Alter Pharma Group joined forces with the award-nominated co-packer Konings, to produce and distribute to pharmacies around the country 21,000 bottles of hand sanitizer for free. After the successful donation, Alter Pharma and Konings decided to take it a step further and created “Alter Care Protect,” a high-end sanitizing alcohol gel, containing Aloe Vera (for comfort and skin care) and Eucalyptus (for a pleasant and fresh scent).

When confronted with a high demand for hand sanitizer of two business partners, [Bewel](#) and [Entiris<sup>1</sup>](#), which provide sorting/logistics and repackaging services, Konings and Alter Pharma didn't hesitate and joined forces once again to help their partners so they could guarantee further safe production. In the scope of this cooperation, Alter Pharma and Konings will donate a number of pallets of Alter Care Protect gel and regular alcohol-based hand gel to meet the internal needs of their partner organizations.

*Konings NV is an international co-packer/contract manufacturer active in the beverage industry who shifted a part of its capacity to produce disinfecting alcohol during COVID-19. The Alter Pharma Group is a Belgian pharmaceutical agglomerate, which focuses on the distribution of medicines and the development and manufacturing of generic pharmaceutical products destined for markets worldwide.*
