

# ALTER PHARMA GROUP NV

## GLOBAL GENERICS OPERATIONS BUSINESS UNIT

### DATA ANALYST / BUSINESS INTELLIGENCE

#### ABOUT OUR COMPANY

**Alter Pharma** is a Belgian group of pharmaceutical companies with headquarters in Anderlecht (Belgium) and offices in Ireland and the United States. Employing in total over 140 employees, the Group distributes a wide range of pharmaceutical products to pharmacies, wholesalers, hospitals and retirement homes. At the same time, Alter Pharma is a global player on the generics market, with around 15 molecules on the European and US market and a fully stocked pipeline of niche, complex and added value products.

#### Our values

Our talented staff daily work in accordance with our company values:

- We are proud of our entrepreneurial culture and foster open communication, mutual respect, professionalism and efficient decision-making and we believe that our multicultural organisation is one of our most important competitive advantages.
- We believe that timely and well considered decisions as a response to emerging opportunities and ideas is the key to our success.
- We believe that the success of the company lies in the competence, dedication and motivation of each of our employees.
- We believe that freedom returns flexibility and empowerment returns commitment.

We are currently looking for a talented Data Analyst / Business Intelligence to help us proactively managing the lifecycle of the medicinal products. The successful candidate must have experience working with large data sets and understand how to manipulate and analyze them using various statistical and mathematical methods and has at least 2+ years of experience in a Data Analyst / Business Intelligence or relevant role.

You will report directly to the companies' Key Account Manager and will be based in Anderlecht, Belgium.

#### The job description

The Data Analyst / Business Intelligence undertakes full responsibility of the following:

##### Main Responsibilities

- You manage master data, including creation, updates, and deletion
- You process confidential data and information according to guidelines
- Helping develop reports and analysis
- You analyze data using statistical methods
- You create reports to share findings and recommendations with the internal team and other stakeholders

- You collaborate with managers to determine and address data and report needs for various company projects
- You create statistical models that depict company-wide trends
- You perform testing and validate data sets
- Document structures and types of business data

Our commercial department will collaborate with you to determine what data should be collected and interpreted.

### Your professional profile

The successful candidate has a bachelor's degree in mathematics, statistics, computer science, information technology, or related field preferred or equivalent through experience and have at least 2+ years of experience in a Data Analyst / Business Intelligence or relevant role.

You must have experience working with large data sets and understand how to manipulate and analyze them using various statistical and mathematical methods.

Your goal will be to provide our team with valuable information.

You are an expert with Microsoft Excel and various business intelligence and analytical tools.

### Your abilities

- Understanding of data gathering, inspecting, cleansing, transforming, and modeling/diagramming techniques
- You have excellent communication skills
- Keen attention to detail
- You have strong analytical capabilities
- You speak and write fluently English. Other languages are an asset.
